Stop costly returns due to shipping damage. Cheaper boxes may not survive the hazards of everyday shipping and handling.

- Uline and UPS recommend 200 lb. test boxes, which provide more strength and protection than 32 ECT boxes – a budget-friendly alternative for lightweight shipments.
- Uline 200 lb. test boxes are made with heavier paper and have **60% greater** bursting strength than 32 ECT boxes.
- Greater bursting strength means fewer crushed and damaged boxes during shipping.
- Uline refuses to sacrifice the quality of our boxes.
