

TOWEL BAR

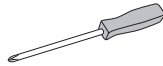

TOOLS NEEDED

Electric Drill

1/8" Drill Bit

Phillips
Screwdriver

Level

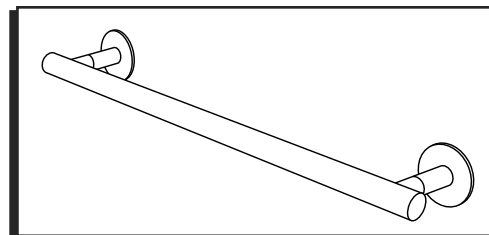

Allen Wrench
(included)

3/4" Apache 200 Drill Bit
(H-6486-BIT)
(optional)

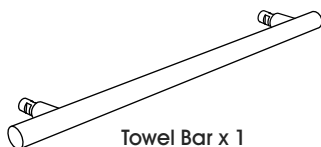

Stud Finder
(optional)

PARTS

Flange x 2

Towel Bar x 1

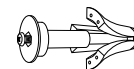

Stainless Steel
Screw x 2

Set Screw x 2

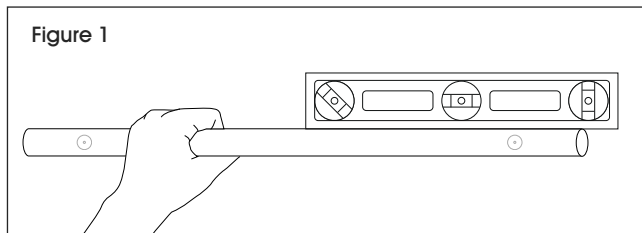

3M Waterproof
Tape x 2

H-12861 Fastener x 2
(not included)

INSTALLATION

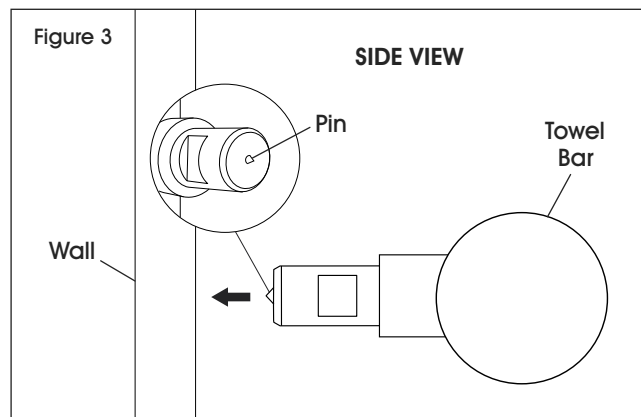

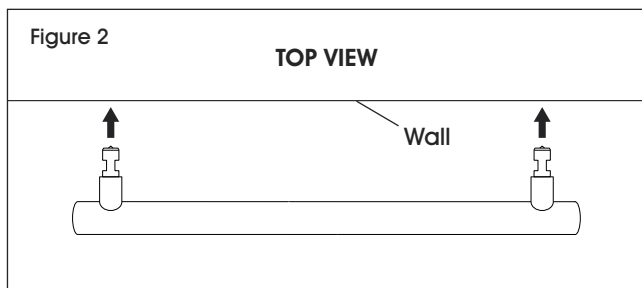

1. Place towel bar on wall in desired location and level.
(See Figure 1)

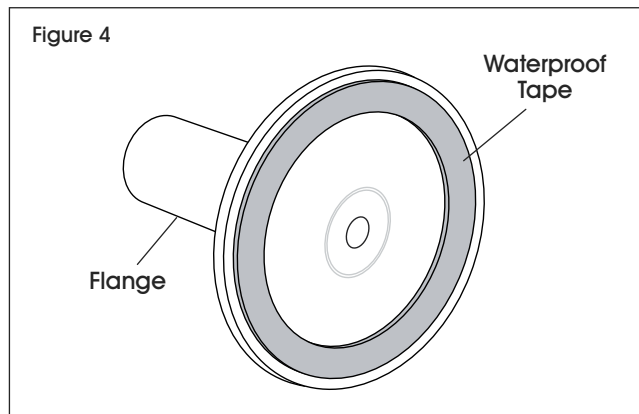

2. Mark mounting hole locations in wall with pins on ends of towel bar. (See Figures 2-3)

IMPORTANT! If mounting into wall studs, ensure marked locations align with wall studs.

3. Place waterproof tape on back of flanges. (See Figure 4)

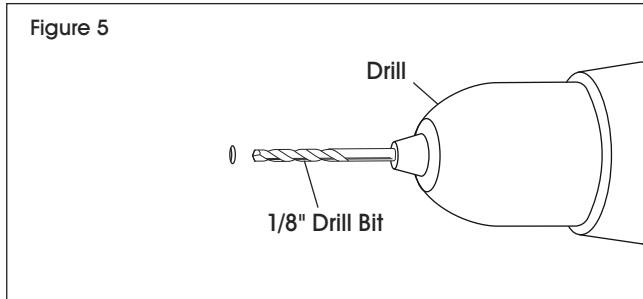

MOUNTING

WALL STUD MOUNTING

 **NOTE:** Do not use in ceilings. Never install any fastener into wet or deteriorating walls.

1. Drill hole using 1/8" drill bit at previously marked locations. (See Figure 5)

2. Insert included stainless steel screw into flange. Align screw with drilled hole in wall. Secure flange to wall with stainless steel screw using a Phillips screwdriver. (See Figures 6-7)

 **NOTE:** Ensure set screw hole is facing 90 degrees to the left or right.

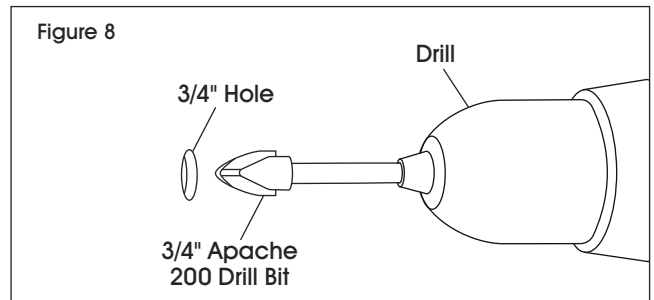

3. Repeat for second hole.
4. Proceed to Towel Bar Installation on page 4.

HOLLOW WALL MOUNTING

 **NOTE:** Setup is designed to accommodate wall substrates up to 1 1/8" thick.

 **NOTE:** Uline model # H-12861 fastener is recommended for this mounting method. Call Uline Customer Service at 1-800-295-5510 to order.

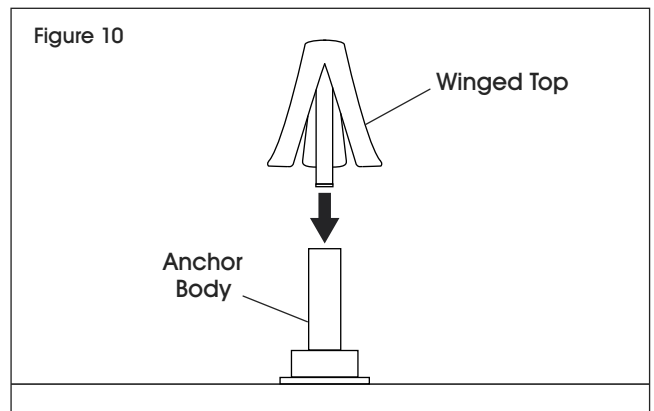

1. Drill hole using 3/4" Apache 200 drill bit at previously marked locations. (See Figure 8)

2. Remove one side of tape ring from H-12861 fastener kit and stick onto anchor body face plate. (See Figure 9)

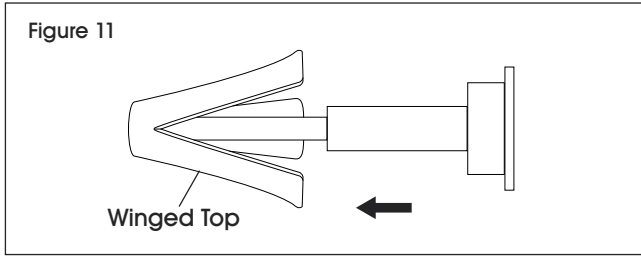

3. Find flat, secure surface. Using your palm, pop winged top onto anchor body. (See Figure 10)

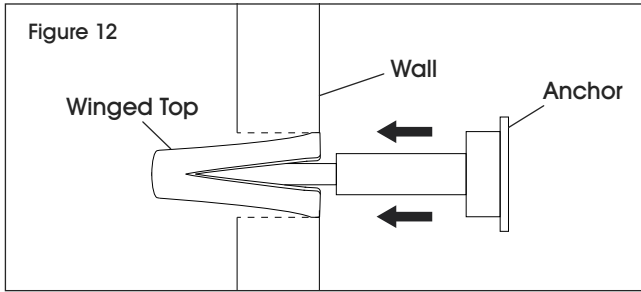

MOUNTING CONTINUED

4. Extend winged top to full length. (See Figure 11)

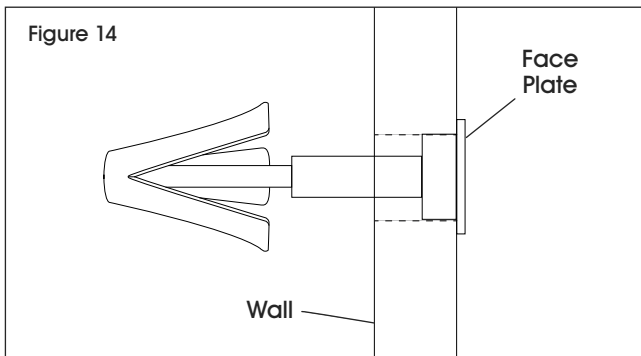

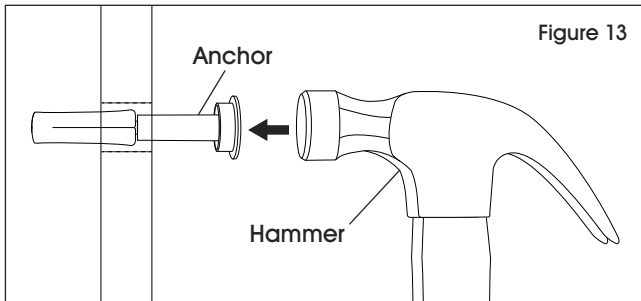

5. Compress winged top and insert anchor into wall. (See Figures 12)

 **NOTE:** Wing tips should be flush with surface when fastener is inserted into wall.

6. Gently tap anchor through wall with hammer until face plate is flush with wall surface. (See Figures 13-14)

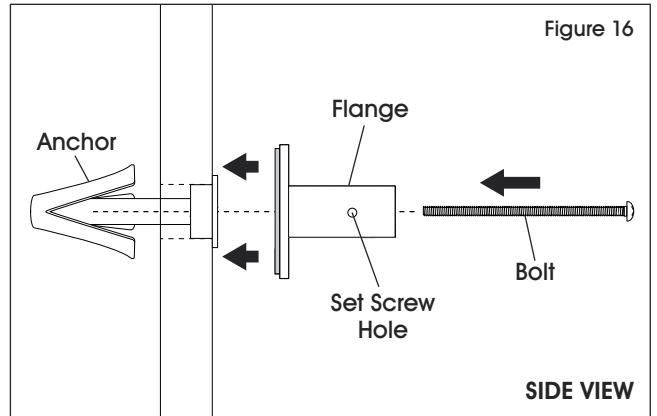

7. Remove remaining tape ring cover on anchor face plate. (See Figure 15)

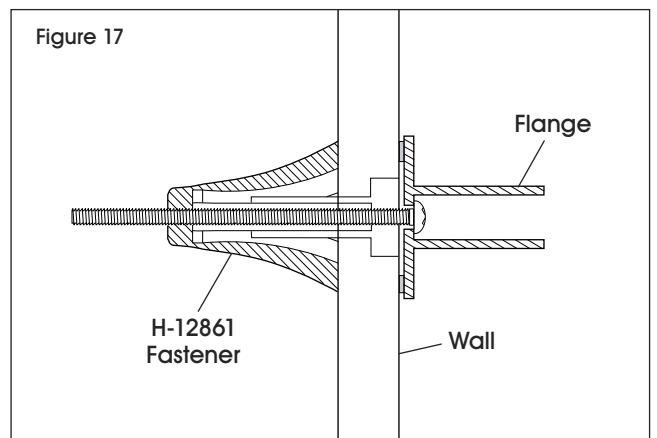

8. Align flange with anchor in wall. Insert bolt through flange and into anchor. (See Figure 16)

 **NOTE:** Ensure set screw hole is facing 90 degrees to the left or right.

9. Tighten screw with Phillips screwdriver to secure flange to wall. (See Figures 17)

10. Repeat for second hole.

11. Proceed to Towel Bar Installation on page 4.

INSTALLATION CONTINUED

TOWEL BAR INSTALLATION

Insert towel bar into flange and tighten set screw with Allen wrench. Repeat for second flange.
(See Figures 18-19)
