

ULINE H-4888 VERTICAL BAR RACK

1-800-295-5510
uline.com

TOOL NEEDED

PARTS

Cross Brace x 2

Bolt x 22

Nut x 22

Washer x 22

Lock Washer x 22

Anchor Hardware Set x 4 (Optional)
(Each set includes Anchor Bolt and
Sleeve, Washer, and Nut)

Upper Beam x 1

Top Shelf x 1

Middle Shelf x 1

Bottom Shelf x 1

Base x 1

ASSEMBLY

 **NOTE:** Do NOT fully tighten bolts until the last step.

1. Attach upper beam to back left and back right post using bolts, nuts and washers. (See Figure 1)

2. Attach front left and front right posts to back left and back right posts using bolts, nuts and washers. (See Figures 2)

3. Attach top shelf to all four posts using bolts, nuts and washers. Then attach middle shelf, followed by the bottom shelf. (See Figures 3-4)

4. Stand unit up and attach posts to base using bolts, nuts and washers. (See Figure 5)

 **NOTE:** Back posts attach to outside of base. Front posts attach to inside of base.

5. Attach cross braces to top and bottom shelf using bolts, nuts and washers. (See Figure 6)

 **NOTE:** You will need to remove the bolts, nuts and washers that are already in the shelves and then reattach.

6. Tighten all nuts and bolts. Attach the safety chain. (See Figure 7)

ANCHORING (OPTIONAL)

TOOLS NEEDED

Power Drill

3/8" Diameter Masonry Drill Bit

9/16" Wrench

Hammer

Safety Glasses

Figure 10

WARNING! Always wear safety glasses to avoid personal injury.

1. Verify that the vertical bar rack is positioned in the desired location. Mark the floor where all the holes will be drilled, then move the rack in order to drill the holes.
2. Using a 3/8" diameter masonry drill bit, drill a hole in all marked locations approximately 3" deep into the floor.

NOTE: For the anchor to function properly, the hole must not be larger in diameter than the anchor bolt hardware.

3. Clean debris and dust from inside the holes. Then align the rack over all holes.
4. Fully insert the anchor bolt and sleeve through the vertical bar rack base and into the hole. Slightly tap down the anchor bolt with a hammer if needed. (See Figure 10)
5. Slide washer over the anchor bolt and sleeve. Tighten the nut with 9/16" wrench until the anchor bolt is secure. (See Figure 10)
6. Repeat steps 3-5 for remaining holes.

HERRAMIENTA NECESARIA

Llave de 11/16"

PARTES

2 Soportes Transversales

22 Pernos

22 Tuercas

22 Rondanas

22 Rondanas de Bloqueo

1 Cadena de Seguridad

4 Sets de Anclaje (Opcionales)
(Cada set incluye un Perno, Taquete, Rondana y Tuerca).

1 Viga Superior

1 Repisa Superior

1 Repisa Intermedia

1 Repisa Inferior

1 Base

ENSAMBLE

 **NOTA: NO apriete completamente los pernos hasta el último paso.**

1. Fije la viga superior a los postes posterior izquierdo y posterior derecho usando pernos, tuercas y rondanas. (Vea Diagrama 1)

2. Fije los postes frontal izquierdo y frontal derecho a los postes posterior izquierdo y posterior derecho usando pernos, tuercas y rondanas. (Vea Diagrama 2)

3. Fije la repisa superior a los cuatro postes usando pernos, tuercas y rondanas. A continuación, fije la repisa intermedia, seguida de la repisa inferior. (Vea Diagramas 3-4)

4. Ponga la unidad de pie y fije los postes a la base usando pernos, tuercas y rondanas. (Vea Diagrama 5)

 **NOTA: Los postes posteriores se fijan a la parte exterior de la base. Los postes frontales se fijan a la parte interior de la base.**

5. Fije los soportes transversales a las repisas superior e inferior usando pernos, tuercas y rondanas. (Vea Diagrama 6)

 **NOTA: Deberá quitar los pernos, tuercas y rondanas que ya están en las repisas y luego volverlos a colocar.**

6. Apriete todas las tuercas y pernos. Fije la cadena de seguridad. (Vea Diagrama 7)

ANCLAJE (OPCIONAL)

HERRAMIENTAS NECESARIAS

Taladro Eléctrico

Broca de 1/2"
para Mampostería

Llave de 9/16"

Martillo

Lentes de Seguridad

Diagrama 10

¡ADVERTENCIA! Siempre use lentes de seguridad para evitar lesiones personales.

1. Compruebe que el rack de barras verticales esté colocado en la ubicación deseada. Marque el piso en el lugar en el que se harán todos los orificios, luego mueva el rack para perforar los orificios.
2. Usando una broca de 3/8" de diámetro para mampostería, perfora un orificio en cada ubicación marcada aproximadamente a 3" de profundidad en el piso.

NOTA: Para que el anclaje funcione de manera adecuada el orificio no debe ser de un diámetro mayor que el perno de anclaje.

3. Limpie los desechos y polvo del interior de los orificios. Luego alinee el rack sobre los orificios.
4. Inserte por completo el perno y el taquete a través de la base del rack vertical para barras y en el orificio. Si fuera necesario, golpee ligeramente el perno de anclaje con un martillo. (Vea Diagrama 10)
5. Deslice la rondana en el perno y taquete. Apriete la tuerca con una llave de 9/16" hasta que el perno quede fijo. (Vea Diagrama 10)
6. Repita los pasos 3-5 para los orificios restantes.

SUPPORT À BARRES VERTICAL

1 800 295-5510
uline.ca

OUTIL REQUIS

Clé de 11/16 po

PIÈCES

REMARQUE : les montants arrière ont un trou décalé sur leur extrémité supérieure.

REMARQUE : l'extrémité inférieure des montants avant est biaisée.

Montant arrière gauche x 1

Montant arrière droit x 1

Montant avant gauche x 1

Montant avant droit x 1

Renfort transversal x 2

Boulon x 22

Écrou x 22

Rondelle x 22

Rondelle de blocage x 22

Ensemble de matériel d'ancrage x 4 (optionnel)
(Chaque ensemble comprend un boulon d'ancrage, un manchon d'ancrage, une rondelle et un écrou)

Chaîne de sécurité x 1

Traverse de soutien supérieure x 1

Tablette supérieure x 1

Tablette du milieu x 1

Tablette inférieure x 1

Base x 1

ASSEMBLAGE

REMARQUE : NE serrez PAS complètement les boulons avant la dernière étape.

1. Fixez la traverse de soutien supérieure aux montants arrière gauche et arrière droit à l'aide de boulons, d'écrous et de rondelles. (Voir Figure 1)

2. Fixez les montants avant gauche et avant droit aux montants arrière gauche et arrière droit à l'aide de boulons, d'écrous et de rondelles. (Voir Figure 2)

3. Fixez la tablette supérieure aux quatre montants à l'aide de boulons, d'écrous et de rondelles. Ensuite, fixez la tablette du milieu, puis la tablette inférieure. (Voir Figures 3 à 4)

4. Placez l'unité à la verticale et fixez les montants à la base à l'aide de boulons, d'écrous et de rondelles. (Voir Figure 5)

REMARQUE : Les montants arrière se fixent à l'extérieur de la base. Les montants avant se fixent à l'intérieur de la base.

5. Fixez les renforts transversaux aux tablettes supérieure et inférieure à l'aide de boulons, d'écrous et de rondelles. (Voir Figure 6)

REMARQUE : Vous devez retirer les boulons, les écrous et les rondelles qui sont déjà installés dans les tablettes, puis les fixer de nouveau.

6. Serrez fermement tous les écrous et boulons. Fixez la chaîne de sécurité. (Voir Figure 7)

ANCORAGE (FACULTATIF)

OUTILS REQUIS

Perceuse
électrique

Mèche à maçonnerie
de 1/2 po de diamètre

Clé de 9/16 po

Marteau

Lunettes de sécurité

Figure 10

AVERTISSEMENT! Portez toujours des lunettes de sécurité afin de prévenir toute blessure corporelle.

1. Assurez-vous que le support à barres vertical est placé à l'endroit désiré. Tracez des repères sur le plancher aux endroits où les trous seront percés, puis déplacez le support afin de percer les trous.
2. À l'aide d'une mèche à maçonnerie de 3/8 po de diamètre, percez au sol un trou d'environ 3 po de profondeur aux endroits marqués.

REMARQUE : Pour que l'ancrage fonctionne correctement, le diamètre du trou ne doit pas dépasser celui du boulon d'ancrage.

3. Retirez les débris et la poussière de l'intérieur des trous. Alignez le support au-dessus des trous.
4. Insérez entièrement le boulon d'ancrage et le manchon d'ancrage dans le trou, en passant à travers la base du support à barres vertical. Enfoncez légèrement le boulon d'ancrage avec un marteau si nécessaire. (Voir Figure 10)
5. Glissez une rondelle par-dessus le boulon d'ancrage et le manchon d'ancrage. Serrez l'écrou avec la clé de 9/16 po pour sécuriser le boulon d'ancrage. (Voir Figure 10)
6. Répétez les étapes 3 à 5 pour les autres trous.
