Para Español, vea páginas 3-4.  
Pour le français, consulter les pages 5-6.

**TOOLS NEEDED**

Phillips  
Screwdriver

Level

Tape  
Measure

Drill

Appropriate-Sized  
Drill Bit

**PARTS**

Mirror x 1

Mounting Bracket x 1

Screw x 4  
(not included)

Wall Anchor x 4  
(not included)

**INSTALLATION**

1. Verify all dimensions and wall space prior to installation.

**NOTE:** At least 1½" of clear space is needed above the mirror on the wall for easy installation. (See Figure 1)

2. Hold mounting bracket on the wall where mirror will be placed. Mark four holes where screws and wall anchors will be placed. (See Figure 2)

# INSTALLATION CONTINUED

**NOTE:** Mirror will extend 2¼" above mounting bracket and 2" below bracket. (See Figure 3)

3. Drill holes in wall at marked locations. Insert wall anchors. (See Figure 4)

4. Hold bracket over drilled holes and insert screws. Tighten using a Phillips screwdriver. (See Figure 5)

5. Carefully slide mirror down onto the bracket, ensuring it locks into bracket tabs. (See Figure 6)

6. Try lifting mirror after installation. Unit was correctly installed if it does not slide off.

**NOTE:** If looking to replace or remove mirror, call Uline Customer Service at 1-800-295-5510 to order the H-9526 removal tool.

## IMPORTANT!

- Adequate in-wall backing must be provided by installer to fully support weight of unit. Always check local codes and ordinances prior to installation.
- Use extreme care when removing wall bracket from back of mirror. Do not allow tabs or slots to become flat or bent out of shape.
- Ensure slots on back of mirror slide over all the wall bracket tabs. When mirror is secured to wall, a concealed locking tab will audibly snap into locking position.
- If mirror lifts off wall, check for damaged tabs or slots.
- Mirrors are not interchangeable from horizontal to vertical, or vice versa.

Adecuado**PARTES**

1 Espejo

1 Soporte de  
Instalación4 Tornillos  
(no incluidos)4 Taquetes para Pared  
(no incluidos)**INSTALACIÓN**

1. Antes de instalar verifique todas las dimensiones y el espacio de la pared.

**NOTA:** Se necesita por lo menos 1½" de espacio libre por encima del espejo en la pared para instalar fácilmente. (Vea Diagrama 1)

2. Sostenga el soporte de instalación sobre la pared donde se colocará el espejo. Marque cuatro orificios donde se colocarán los tornillos y taquetes. (Vea Diagrama 2)

# CONTINUACIÓN DE INSTALACIÓN

**NOTA:** El espejo abarcará 2 1/4" por encima del soporte de instalación y 2" por abajo del soporte. (Vea Diagrama 3)

3. Taladre orificios en la pared en los lugares marcados. Inserte los taquetes. (Vea Diagrama 4)

4. Sostenga el soporte sobre los orificios perforados e inserte los tornillos. Apriete con un desarmador de cruz. (Vea Diagrama 5)

5. Con cuidado deslice el espejo hacia abajo sobre el soporte, asegurándose de que se acomode en las pestañas del soporte. (Vea Diagrama 6)

6. Intente levantar el espejo después de instalarlo. La unidad se instaló correctamente si no se suelta.

**NOTA:** Si necesita reemplazar o quitar el espejo, llame a Servicio a Clientes de Uline al 800-295-5510 para ordenar la herramienta H-9526 para poder retirarlo.

## ¡IMPORTANTE!

- El instalador debe proporcionar refuerzo adecuado en la pared para soportar todo el peso de la unidad. Antes de instalar siempre verifique los códigos y normas locales.
- Tenga mucho cuidado al retirar el soporte de la pared en la parte posterior del espejo. No permita que las pestañas o ranuras se aplanen o se doblen.
- Asegúrese de que las ranuras en la parte posterior del espejo se deslicen por completo sobre las pestañas del soporte de pared. Cuando el espejo está asegurado a la pared, una pestaña de bloqueo oculta sonará cuando se encaje en su lugar.
- Si el espejo se desprende de la pared, revise si tiene pestañas o ranuras dañadas.
- Los espejos no son intercambiables de horizontal a vertical o vice versa.

**MIROIR DE SALLE DE BAIN**

**OUTILS REQUIS**

Tournevis  
cruziforme

Niveau à  
bulles

Ruban à  
mesurer

Perceuse

Mèche de  
perceuse de taille  
adaptée

**PIÈCES**

Miroir x 1

Support de fixation x 1

Vis x 4  
(non inclus)

Ancrage mural x 4  
(non inclus)

**INSTALLATION**

1. Vérifiez toutes les dimensions et l'espace mural avant l'installation.

**REMARQUE :** Prévoyez au moins 1 ½ po d'espace libre sur le mur au-dessus du miroir pour permettre une installation facile. (Voir Figure 1)

2. Maintenez le support de fixation au mur à l'emplacement où le miroir sera positionné. Marquez quatre trous sur le mur là où les vis et les ancrages seront insérés. (Voir Figure 2)

# INSTALLATION CONTINUED

**REMARQUE :** Le miroir dépasse de 2 ¼ po au-dessus du support de fixation et de 2 po en-dessous. (Voir Figure 3)

3. Percez les trous au mur au niveau de chacun des emplacements marqués. Insérez les ancrages muraux. (Voir Figure 4)

4. Maintenez le support au niveau des trous percés et insérez les vis. Serrez le tout en vous servant d'un tournevis cruciforme. (Voir Figure 5)

5. Faites glisser le miroir délicatement sur le support en veillant à l'enclencher sur les languettes du support. (Voir Figure 6)

6. Essayez de soulever le miroir après l'installation. Le miroir est correctement installé s'il ne se détache pas du support.

**REMARQUE :** Si vous souhaitez remplacer ou retirer le miroir, appelez le service à la clientèle de Uline au 1 800 295-5510 pour commander l'outil de démontage H-9526.

## IMPORTANT!

- Un renfort mural devra être fourni par l'installateur afin de supporter le poids du miroir. Vérifiez toujours les codes et règlements locaux avant l'installation.
- Faites preuve d'une très grande vigilance lorsque vous retirez le support mural au dos du miroir. Veillez à ce que les languettes et les fentes ne s'aplatissent pas et ne se déforment pas.
- Assurez-vous que les fentes à l'arrière du miroir s'insèrent toutes autour des languettes du support mural. Lorsque le miroir est solidement fixé au mur, une languette de verrouillage dissimulée s'encliquète et se verrouille de façon audible.
- Si vous parvenez à détacher le miroir du mur, vérifiez que les languettes ou les fentes ne sont pas endommagées.
- Les miroirs ne peuvent pas être déplacés d'une position horizontale à verticale, ou inversement.
