If possible, contain and collect firefighting water for later disposal.

SECTION 6 - TOXICOLOGICAL PROPERTIES

EFFECTS OF ACUTE EXPOSURE:

EYES: Contacts with the eyes and mucosa can cause irritation, redness and pain.

SKIN: In normal use, does not cause irritation. However, sensitive individuals may develop minor skin irritation.

INHALATION: N.A.

INGESTION: Chlorhexidine Gluconate has a relatively low LD50 value since it is poorly absorbed by the intestine. It is rather eliminated in the faeces. The Isopropyl Alcohol is however more harmful if ingested. It may: irritate the gastro-intestinal track, affect the nervous system, liver and kidneys. May cause nausea, headache and alter vision.

EFFECTS OF CHRONIC EXPOSURE:

Prolonged and repeated exposure by application on the skin may cause a chronic skin irritation.

SECTION 7 - PREVENTATIVE MEASURES

AS NEEDED, APPLY THE APPROPRIATE MEASURES ACCORDING TO THE AMPLITUDE OF EXPOSURE.

SKIN: N.A.

EYES: Avoid any contact with the eyes.

RESPIRATORY TRACT: N.A.

OTHER PROTECTIVE EQUIPMENTS: N.A.

VENTILATION: N/A.

IN CASE OF SPILL OR LEAK: Absorb spills with a neutral absorbing material. Rinse with water.

WASTE DISPOSAL: As dictated by the federal, provincial and municipal, rules.

STORAGE REQUIREMENTS: Keep bottle tightly closed and store at room temperature. Avoid exposure to temperatures above 25°C.

SECTION 8 – FIRST AID MEASURES

EYES: Flush eyes immediately with large volumes of water for 15 minutes. Consult a physician.

SKIN: In case of accidental contact with skin, wash with soap and rinse with water. If irritation appears, it will probably disappear if not, cease using and consult a physician.

INHALATION: N.A.

INGESTION: Do not induce vomiting. In case of non-induced vomiting, lean victim forward to prevent any risk of asphyxia and give water. Never give any liquid to an unconscious person. Get medical attention.
