

Periodic Compliance Report Form 4G

Ref: WI LA 038

Origi	nal - P	Periodic Retest File	Rei: WI LA 038
		eriodic Test, Zacros America	
		Retest Report # 24-058	
Ref. (Origina	al Design Report # 301	
Mate	rials:	As listed in specification report	
		pecification NoCUA1677,CUA5908, CUA9777	
	De	escription 10L Cubitainer w/ 38mm hybrid tube	
	Se	ee attached specifications.	
	A.	Closure Torque	
		Closure application torque of	
	B.	Flap Closure Method Hot Glue	
		. Iot Glud	
	C.	<u>Dustcover Installation - COM0943</u> (Only required for Cubitainer)	
		Dustcover was secured in top flap using 3M tape # 375 , The tape extends 2" side panels of the box.	48mmwide.
Proced	lure:		
	A.	0° Drop Test (CFR 49 Sec. 178.603)	
		Five samples were filled to no less than 98% capacity with a water / property (sp.gr. 1.0g/mL minimum) and conditioned in a freezer until container an reduced to -18°C or lower. After conditioning each sample was dropped 1.5 meters onto a surface using various attitudes.	pylene glycol solution d contents were from a height of
		* All paper & fiberboard packagings were conditioned for 24 hours at 50% RH /	23°C.
	B.	Stacking Test (CFR 49 Sec. 178.606)	
		Three samples were filled to no less than 98% capacity with water and significant department of the samples were filled to no less than 98% capacity with water and significant department of the samples were filled to no less than 98% capacity with water and significant department of the samples were filled to no less than 98% capacity with water and significant department of the samples were filled to no less than 98% capacity with water and significant department of the samples were filled to no less than 98% capacity with water and significant department of the samples were filled to no less than 98% capacity with water and significant department of the samples were filled to no less than 98% capacity with water and significant department of the samples were filled to the samples were filled	ubjected to a load of
		* All paper & fiberboard packagings were conditioned for 24 hours at 50% RH / $^\prime$	23°C.
	C.	Vibration Test (CFR 49 Sec. 178.608)	
		Three samples were filled to no less than 98% capacity with water and subjected vibration test each.	d to one (1) hour
Results:	Α.	Drop Test	
	Samp 1	Flat on Bottom Result (Pass or Fail) Pass	
	2	Flat on Top Pass	
	4 5	Flat on Short Side Pass On a Corner Pass
