

WIRE SHELVING GUIDE

CHROME WIRE

Bright, chrome-plated carbon steel provides durable everyday shelving.

- Recommended for dry storage rooms, offices and garages.
- Not recommended for wet environments.

BLACK WIRE

Decorative, black powder-coated steel provides durable everyday shelving.

- Recommended for offices, stores and warehouses.
- Not recommended for wet environments.

WHITE WIRE

Attractive, white powder-coated steel provides durable everyday shelving.

- Recommended for showrooms, retail spaces and bathrooms.
- Not recommended for wet environments.

EPOXY WIRE

Extremely rust resistant. Epoxy-coated shelving withstands harsh cleaning, salt, water and chemicals. Available in Green and Zinc.

- Recommended for dining halls, labs and kitchen coolers.

STAINLESS STEEL WIRE

Absolutely will not rust. Type 304 stainless steel withstands the harshest environments.

- Recommended for labs, restaurants and hospitals.

VENTED PLASTIC

Plastic shelves pop off for easy cleaning and sanitizing. Dishwasher safe.

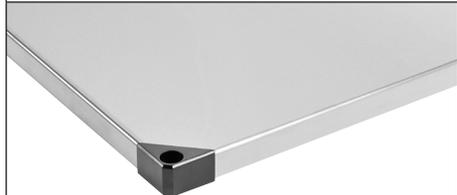

- Microban® antimicrobial coating prevents mold and bacteria growth.
- Recommended for commercial kitchens, bakeries and restaurants.

SOLID GALVANIZED STEEL

Galvanized steel shelves resist rust and corrosion.

- Solid shelves with raised edges help contain spills and fall-through.
- Recommended for commercial kitchens, bakeries and labs.

SOLID STAINLESS STEEL

Absolutely will not rust. Type 304 stainless steel withstands the harshest environments.

- Solid shelves with raised edges help contain spills and fall-through.
- Recommended for commercial kitchens, labs and cleanrooms.
